| Team ID       | PNT2022TMID19834                      |  |
| Project Name  | Smart Fashion Recommender Application |  |
| Maximum Marks | 4 Marks                               |  |

## **Technical Architecture:**

S

## **Table-1 : Components & Technologies:**

| S.No | Component                       | Description   | Technology             |
|------|---------------------------------|---|------------------------|
| 1.   | User Interface                  | How user interacts with application e.g. Web UI, Mobile App, Chatbot etc. | HTML, CSS, JavaScript  |
| 2.   | Application Logic-1             | Logic for a process in the application                                    | Python                 |
| 3.   | Application Logic-2             | Logic for a process in the application                                    | IBM Watson STT service |
| 4.   | Application Logic-3             | Logic for a process in the application                                    | IBM Watson Assistant   |
| 5.   | Database                        | Data Type, Configurations etc.  | MySQL                  |
| 6.   | Cloud Database                  | Database Service on Cloud   | IBM DB2                |
| 7.   | File Storage                    | File storage requirements   | IBM Block Storage      |
| 8.   | Infrastructure (Server / Cloud) | Application Deployment on Cloud Cloud Server Configuration : Db2 /python  | Kubernetes,            |

## **Table-2: Application Characteristics:**

| S.No | Characteristics                | Description   | Technology                 |
|------|--------------------------------|---|----------------------------|
| 1.   | Open-Source Frameworks         | Flask   | Python                     |
| 2.   | encryption hashing and salting | Encryption hashing and salting                                  | Encryptions                |
| 3.   | Scalable Architecture          | Getting resources to different parts of the system that need it | Microservices Architecture |
| 4.   | Availability                   | The Application available 24/7                                  | IBM Cloud                  |
| 5.   | Performance                    | 1000 request per day  | IBM Watson                 |
|      |                                |   |                            |
